案例 2

a 76-year-old male patient with underlying disease of

#1. Gastric adenocarcinoma

-- s/p total gastrectomy with D2 and roux-en-y esophageojejunostomy +feeding jejunostomy - pT4aN2Mb

-- s/p chemotherapy with TS-1 since 2018/09/01

-- bone metastasis of left sacrum, left iliacus and left proximal

-- s/p palliative RT 30Gy/10fx on 2018/12

-- s/p palliative chemotherapy with FOLFOX since 2019/01

#2. Hx of PPU s/p subtotal gastrectomy with B II anastomosis

#3. Old CVA

#4. HTN

#5. Hyperlipidemia

#6. Hemorrhoid

案例 3

a 43-year-old man has had medical history of

#. Soft palate cancer, SCC, cT4bN0M1 stage IVC

s/p CCRT completed on 2017/08

s/p 1st line palliative chemotherapy with paclitaxel/cetuximab

s/p 2nd line palliative chemotherapy with methotrexate/cetuximab

s/p 3rd line immunotherapy with Nivolumab 3mg/kg since 107/07 (7th, 108/01)

s/p 3rd line palliative chemotherapy with Carboplatin/5-FU since 2018/08

#. Anemia grade 4

#. Chronic hepatitis B, taking Entecavir

#. Chronic granulomatous inflammation of apical lung, bilateral, lung mata?

#. Type 2 diabetes mellitus

#. Hyperlipidemia

#. Hemoptysis

He has frequent bleeding from oral cavity, Weight loss, neck swelling and dyspnea.

Solu-cortef was also administered for him
